WIKIPAD PRICE DROP

$199 Price Point Provides Gamers Android Gaming Tablet

Wikipad, Inc. (wikipad.com) today announced a price drop for the Wikipad 7" gaming tablet. Now priced at $199, Wikipad 7" is the only tablet to possess both the unique combination of a console quality gaming experience with the functionality and portability of a tablet thanks to its award-winning and patented detachable dual-analog controller.

The Wikipad 7" gaming experience offers controller mapping, which eliminates one of the limitations of mobile games is that complex games often have control schemes not suited for touch screens. Aptly named Wikipad Controller Assistant, users can transform ordinary touchscreen controls of virtually any Android game into extraordinary gaming experiences using Wikipad's patented gamepad controller. Content is king and Wikipad 7" offers a complete ransom of software riches such as Madfinger Games' Dead Trigger 2 and titles from amazing partners such as Google Play from Google Mobile Services, PlayStation®Mobile games from Sony Computer Entertainment Inc., and TegraZone – NVIDIA's free app that highlights the best games optimized for the Tegra processor.

When the gamepad controller is detached, Wikipad's sleek design and Android 4.2 Jelly Bean operating system provide gamers with power, speed and functionality necessary for surfing the web, watching the latest YouTube sensation, tweeting, checking Facebook status, and enjoying all the latest films, books, magazines and music. Fans can even use dongles such as Google Chromecast to stream content direct from Wikipad 7" to their TV.

Wikipad 7" comes standard with 16 GB memory and possess an additional micro SD slot to support a further 32 GB of storage together with micro USB, GPS, accelerometer and gyroscope. The tablets ultra-light, super thin chassis stands optimized for cloud gaming with a 12 core Nvidia GPU. With an aspect ratio of 16:10, a 2-mega-pixel front facing camera the Wikipad 7" gaming tablet offers true widescreen HD display and HDMI out.
